

Surface Mount

Surface mounted LED swimming pool lights are mounted on the pool walls, which make them easy to install. These are most commonly used for renovations as a great retro fit option.

Since they protrude just out from the wall, they are less likely to break. These are a popular option among new pools with LED lights more preferred than the regular halogen lights.

SURFACE MOUNT

Flush Mount

The beauty of the flush mounted lights is that they sit flush with the pool wall making them totally unobtrusive. The lights are stylish and modern making them ideal for all types of pools, water features, spas, fountains, waterfalls, beach areas, ponds and catch tanks.

FLUSH MOUNT

InstaTouch to Synchronise Lighting

Underwater lighting color and effects controller.

- Intuitive touch-screen wireless handset allows you to instantly select colors for your pool, spa or water feature.
- The wireless handset is robust and water-resistant whilst retaining a slick and stylish appearance.
- Control two lighting zones independently, with a wireless handset that has an extended range.
- Choose from 7 x fixed colors and 6 x color shows, or choose and save your own fixed color.
- No need to replace your existing cables and transformers.
- Enables lights to be dimmed.
- Simple to install, plug and play.
