

LOOKING TO REPLACE YOUR OLD ABOVEGROUND POOL?

LINER FADED AND POOL FALLING APART?

We can transform your backyard in just one week with our ready to swim fibreglass aboveground pool. Light weight, ribbed strength, freestanding and ideal for aboveground or semi inground our Hi Rise pool models are the perfect solution to replace your old aboveground pool.

No excavation or installation required

can be easily placed on a concrete base. All you need is a plumber, electrician and a water hose! With minimal site preparations, all you need is a level site with a concrete base, pool plumber and a certified electrician. Its easy to deck or dress up to suit your landscaping. If you want to place your pool in a unique place, our engineers will work with you to make your dreams come true!

Fortis

Aboveground Pool

The Ultimate Reinforced Fibreglass Plunge Pool

Introducing the Fortis an innovative, strong, and ribbed free-standing fibreglass plunge pool designed for immediate enjoyment. Built using next-gen fibreglass technology, the Fortis is engineered for maximum durability and strength, making it the perfect choice for freestanding use in your outdoor space.

Reinforced Fibreglass Construction: With cutting-edge technology, the Fortis is built to last, providing unparalleled strength and reliability for years of enjoyment.

Ready for Immediate Swimming: Designed to minimize site preparations, the Fortis plunge pool is ready for use as soon as it is filled up.

Lightweight Pre-Cast Ribbed Shell: The advanced pre-cast ribbed design reduces the need for heavy machinery, saving you crane costs while maintaining strength and durability so strong you can install fully aboveground.

Ideal for Aboveground Placement: Perfect for aboveground installation, all you need is a level concrete base, a filtration connection, and a certified electrician.

Customizable Exterior: The unique ribbed design allows you to easily deck or dress up the exterior to suit your landscaping vision, making it a seamless addition to your backyard.

Engineered for Flexibility: If you're considering a more unique or challenging placement, our engineers are here to collaborate with you, ensuring your pool is installed exactly where you envision.

The Fortis plunge pool is designed for those who want an effortless yet high-quality pool solution—quick to install, durable, and adaptable to any space.
